# Anupama Piyadigama

I'm a final year undergraduate of BSc (Hons) in Information Technology from Faculty of Humanities and Social Sciences at University Of Sri Jayewardenepura. I'm a strong team player who is able to quickly learn and apply new technologies. I'm all about combining visual design with product thinking to bring meaningful experiences alive who's passionate about creating digital experiences through problem-solving.

## Projects

### UI/UX DESIGNS

Technologies used: Figma

- I am proficient in using a range of design and prototyping tools such as , Figma, Adobe Creative Suite.
- My expertise lies in conducting user research, creating wireframes, and developing interactive prototypes that not only look visually stunning but also provide an intuitive user experience.

### Ball Rolling Game

(2022 November)

Technologies used: C#

- Developed a 3D game using unity platform and C#

### MERN Web Application for Book Review

(2022 June)

Technologies used: React Js,Mongo DB,Node Js, Express js

- The web application includes features such as an manage profile, read reviews, and write reviews.
- This web application will help readers in discovering new books and reading reviews of books.

### Hotel Booking Application

(2022 December)

Technologies used: Html,Css,Js,React native,firebase

- The app includes a range of features, including a hotel catalogue, search hotels, view hotel information, check available room,and booking a room, all of which are seamlessly integrated with the Firebase back-end.
- The hotel catalogue allows customers to easily browse and filters hotels.
- This app is designed to provide a seamless user experience, making it easy for customers to browse and book hotels from the comfort of their homes.

### Online Examination System

(2022 July)

Technologies used: Java, OOP concept

- Online Examination system is a MCQ base examination system.
- It provides an easy to use environment for both students and teachers.

### Sales Management System

(2022 December)

Technologies used: Python

- Sales System project is useful for inventory management .
- Also it can be used for managing their sales and purchase.
- By the use of this software they can analyse daily sales and product inventory very easily.

### Hotel Website

(2019 December)

Technologies used: Html,Css,Js

- I have developed a Website for Kurunduwatta Holiday resort.
- It contains Facilities, Gallery, contacts, services etc
- The website is developed to provide a seamless user experience and easy navigation, allowing visitors to easily explore all the features of the hotel.

## Soft Skills

---

- Team work
- Communication
- Ability to work under pressure
- Problem Solving
- Creativity
- Time management

## Languages

---

- Sinhala
- English

## Recognitions

---

### **DHACK 2022 - Designathon Challenge**

Uni Helper mobile application  
Getting through the semi final round

## Volunteering

---

### **MEDIA CREW MEMBER IEEE Student Branch USJP**

Institute of Electrical and Electronic Engineers is the world's largest association. I could be a part of a weLead project

### **MEDIA CREW MEMBER Japura Voice**

J'pura Voice, is the Official Media and Broadcasting Unit of USJ. As a media crew member of programming division I could be a part of a lots of projects
